

Syed Muhammad Hamza Sultan

Computer Science Student — Exploring Data Science & Machine Learning Internships

+92 320-2929511 | hamza05sultan@gmail.com | linkedin.com/in/hamzasultan-dev/ | github.com/hamziCodes

Islamabad, Pakistan

PROFESSIONAL SUMMARY

Computer Science student specializing in Data Science and Machine Learning with hands on experience in Python, NLP, machine learning, full-stack development, and mobile application deployment through startup, freelance, and academic projects. Skilled in building scalable software solutions, managing technical workflows, and deploying production ready applications.

EDUCATION

Bahria University Islamabad Campus

BS - Computer Science (DS/ML Major) | CGPA: 3.4

Islamabad, Pakistan

Sep 2023 – Present

Islamabad College of Arts and Sciences

O & A (Mathematics/CompSci)

Islamabad, Pakistan

Aug 2019 – Jul 2023

EXPERIENCE

Co-Founder

Vertex Solutions

Sep 2025 – Present

Islamabad, Pakistan

- Co-founded and managed a tech startup delivering custom web and mobile solutions for B2B clients while independently handling client communication, project planning, outsourcing, backend integrations, deployment pipelines, and App Store releases.

Member

Team WorthAWhile

Feb 2025 – Present

Islamabad, Pakistan

- Participated in volunteer-driven outreach initiatives and collaborative welfare events supporting underprivileged communities through on-ground activities and team coordination.

PROJECTS

Vertex Classify: Software Requirements Classification | *Python, Scikit-learn, FastAPI, Flutter*

- Engineered and deployed an end-to-end NLP classification system using TF-IDF, Logistic Regression, FastAPI, and Flutter to automatically classify software requirement statements with chat-style analysis, PDF/CSV export support, and iOS App Store deployment.

Spice Hut Mobile Application | *iOS App Store, AI-Assisted Development*

- Developed and deployed a custom restaurant mobile application using AI-assisted workflows while managing the complete Apple App Store deployment lifecycle, compliance handling, and promotional asset preparation.

Food Image Classification | *CNN, Transfer Learning, Streamlit*

- Built a CNN-based food image classification system using transfer learning, advanced data augmentation, and an interactive Streamlit interface for real-time prediction visualization.

CERTIFICATIONS

HP LIFE Data Science & Analytics

May 2026

Data Labeling Job Simulation

May 2026

Data Analytics Job Simulation

May 2026

TECHNICAL SKILLS

Languages/Core: Python, C++, HTML, SQL

Data Science & AI: Pandas, NumPy, Scikit-learn, Machine Learning, NLP, Data Preprocessing

Frameworks & Technologies: FastAPI, Flutter, Streamlit, REST APIs

Database Technologies: MongoDB, MySQL, Firebase

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render, Figma

Concepts & Technologies: OOP, Data Structures & Algorithms, DBMS, SDLC, API Integration

Soft Skills: Leadership, Project Management, Communication, Team Coordination
